**SUBJECT:** Minutes of Army Security Agency Technical Committee Meeting No. 6L

**TO:** Interested Members, Army Security Agency Technical Committee and  
 Other Interested Agencies

1. A meeting of the Army Security Agency Technical Committee was held  
 19 August 1949, Room 117, Headquarters Building, Arlington Hall Station.  
 Attendance was as follows:

Chairman

Lt Colonel Charles H. Hiser

Secretary

1st Lt. Mac C. Eversole

Members and Alternates Present

DEPARTMENT OF THE ARMY

GENERAL STAFF, UNITED STATES ARMY  
 Research and Development Group

Lt Col. Richard J. Meyer, Member

ARMY SECURITY AGENCY

Office Special Ass't to Chief  
 Plans and Operations Section, Staff

Mr. Mark Rhoads, Alternate  
 Lt Col D. W. Bernier, Member  
 Major Ralph E. Bergman, Alternate  
 Major A. V. Whitehead, Member  
 Dr. S. Kullback, Member  
 Mr. Leo Rosen, Alternate  
 Mr. H. L. Clark, Alternate

Logistics Section, Staff  
 Research and Development Division

Security Division

Observers Present

DEPARTMENT OF THE ARMY

ARMY SECURITY AGENCY  
 Research and Development Division  
 Security Division

Mr. R. C. Hix  
 Mr. A. W. Small

Members Absent and Concurring

DEPARTMENT OF THE ARMY

ARMY SECURITY AGENCY  
 Operations Division

Mr. Frank B. Rowlett

Minutes Page 1

~~TOP SECRET~~

~~TOP SECRET~~

2. The Subcommittee Reports listed below were recommended for approval by the Army Security Agency Technical Committee. Recommendations contained in these reports have been approved for the Chief, Army Security Agency by the Chairman, Army Security Agency Technical Committee and for the Secretary of the Army by a designated representative of the Director of Logistics, General Staff, United States Army.

<u>Pages</u>	<u>Item</u>	<u>Subject</u>	<u>Action</u>
3-8	33	Initiation of Project No. 1-29-70-006, ASAF 32	Initiation of Project and approval of Military Characteristics
9-15	34	Initiation of Project No. 1-29-70-007, ASAF 33	Initiation of Project and approval of Military Characteristics
16-18	35	Type Classification of ASAN 13	Classification as Standard

3. The following Memoranda for the Record of the Army Security Agency Technical Committee was approved for inclusion in the records of the Committee:

<u>Pages</u>	<u>Item</u>	<u>Subject</u>
19	36	Three Channel Printer Equipment ASAN 8
20	37	Service Project Priorities
21	38	Project Title Change
22	39	Project Title Change
23	40	Cancellation of Projects

4. There being no further business to come before the Committee it adjourned to meet at the call of the Chairman.

*Charles H. Hiser*  
 CHARLES H. HISER  
 Lt. Colonel, Signal Corps  
 Chairman, ASATC

*Mac C. Eversole*  
 MAC C. EVERSOLE  
 1st. Lt., Signal Corps  
 Secretary, ASATC

ITEM # 33

19 August 1949

SUBCOMMITTEE REPORT FOR THE ARMY SECURITY AGENCY TECHNICAL COMMITTEE

SUBJECT: Initiation of Project 1-29-70-006, ASAF 32

1. REFERENCE:

IRS from AS-77 to AS-71, dated 13 May 1949, Subject: Initiation of Project.

2. DISCUSSION:

a. Agencies concerned:

- (1) Cognizant Agency: Army Security Agency
- (2) Directing Agency: Army Security Agency
- (3) Requesting Agency: Army Security Agency
- (4) Participating Agency: National Bureau of Standards
- (5) Coordinating Agency: Navy
- (6) Other Probable Interested Agency: USAF

b. Purpose:

To develop an electronic digital computer particularly adapted for cryptologic problems.

c. Description:

An Electronic Digital computer with an internal memory of 1024, 44 digit words, plus an external magnetic tape memory, and electronic circuits to perform a minimum of 14 orders such as add, subtract, multiply, divide, compare, substitution, shift and branch orders.

d. Related Material:

None

e. Development History and Status:

Research studies have been made. The orders for the equipment have been determined and basic circuit construction has been initiated.

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

## f. Proposed Development:

This project will be local and contract.

- (1) Phases of the project include
  - (a) Further research study
  - (b) Development and construction of equipment
  - (c) Engineering tests
- (2) One engineering test model will be required.
- (3) Priority 1-B is recommended because of the operational requirement.
- (4) Estimated cost of this project FY 50 - \$150,000, FY 51 - \$100,000. In FY 49 approximately \$250,000 was spent under Project No. /29-70-001 on supporting research and development.
- (5) Research started under Project No. /29-70-001. Project /29-70-006, ASAF 32, will be completed approximately 30 June 1951.

## g. Security Classification:

The equipment shall be classified as CONFIDENTIAL. The Military Characteristics shall be classified as CONFIDENTIAL.

## 3. RECOMMENDATIONS:

The Subcommittee recommends that:

- (a) Military Characteristics of ASAF 32 be approved.
- (b) Project No. /29-70-006, ASAF 32, be initiated, classified as development type and assigned a 1-B priority.
- (c) The RDB Master Plan Technical Objective be IO-4.

## 4. EXHIBITS:

Military Characteristics for ASAF 32.

## 5. COORDINATION:

Coordination was accomplished with USCRAD.

LEO ROSEN  
Chairman, Cryptologic  
Subcommittee, ASATC

~~CONFIDENTIAL~~

Prepared by Cryptologic Subcommittee  
Date 6 June 1949  
Approved by ASATC  
Date 19 August 1949

MILITARY CHARACTERISTICS for ASAF 32

Submitted by CSGAS-77  
Date 13 May 1949

I - GENERAL INFORMATION

1. Objective

a. There is a military requirement for a high speed electronic digital computer particularly adapted for cryptologic problems.

2. Proposed Service Employment

- a. Equipment will be utilized at Headquarters, Army Security Agency.
- b. This equipment shall be designed as a fixed installation.

II - OPERATIONAL CHARACTERISTICS

1. Security

Not applicable

2. Functional Requirements

a. The equipment shall have a high speed internal memory of 1024, 44 digit words. An external magnetic tape memory with a capacity of 65,000 words per tape and the possibility of the use of 64 tapes.

b. The repetition rate of the digits in the internal memory mentioned above shall be a minimum of 1 megacycle.

c. The machine shall be capable of performing fourteen (14) orders.

d. The external memory shall consist of reels of magnetic tape on which all data and/or controlling orders are stored.

e. Information shall be transferred from the external memory to the internal memory which shall consist of 128 recirculating acoustic delay lines each capable of storing 384 digits (8 words).

f. All the orders shall be accomplished in the arithmetic unit and the result returned to the internal memory and in turn read out to the external memory.

g. All operations of the machine shall be controlled from the control unit.

3. Range of Transmission/Reception

Not applicable

4. Radio Interference Reduction (including anti-jamming)

Should cause no interference with equipment operating in the same general area.

5. Spurious Radiation of Cleartext

Not applicable

6. Stability

Not applicable

7. Resolution

Not applicable

8. Power Requirement (voltage, frequency, wattage)

a. 220V, 60cps, 50KW three  $\phi$ .

b. No emergency standby power necessary.

c. Permissible frequency variation  $\pm .1$  cps, voltage variation  $\pm 10\%$ .

9. Equipment Operating Position Requirements

Not applicable

10. Special Features

Not applicable

III - PHYSICAL CHARACTERISTICS

1. Weight and Volume Factors

a. Maximum weight will not exceed the floor loading of 125 lbs. per square foot.

b. No maximum limits on volume.

2. Arrangement and Coordination of Component Units

Not applicable

3. Arrangement and Coordination of Crypto-Equipment in relation to Associated Equipment

Not applicable

4. Operation, Transportation, Packaging, and Storage Requirements

a. To stand shock in normal shipment within the zone of the interior.

b. Not applicable

c. 80°F  $\pm$  5 Degrees temperature; 55%  $\pm$  5% relative humidity.

d. Shall be air transportable for use in Phase IV of air operations.

5. Destruction Requirements

Not applicable

6. Special Features

Not applicable

IV - EQUIPMENT OPERATION AND MAINTENANCE CHARACTERISTICS

1. Operating Time (hours per day)

24 less 2 for maintenance period.

2. Permissible Scope of Continuous and Periodic Adjustments, Tuning, Calibrating, Maintenance, etc.

Not applicable

3. Safety Features

a. Fuses and inter-locks will be provided in all cases where necessary to insure safety of all personnel and equipment.

4. Maximum Acceptable Preparation Periods from Packaged for Storage or Shipment Conditions to Secured or Power Off Conditions

Not applicable

~~CONFIDENTIAL~~

5. Maximum Acceptable Preparation Periods from Secured or Power Off Conditions

- a. 4 hours to semi-readiness.
- b. 4 hours, 1 minute to full operation.

6. Personnel Considerations

One skilled operator, two engineers and two skilled technicians for maintenance.

7. Equipment Arrangements to Promote Operators Efficiency

As efficient as possible consistent with functional characteristics.

8. Special Features

Not applicable

~~CONFIDENTIAL~~

ITEM # 35

19 August 1949

SUBCOMMITTEE REPORT FOR THE ARMY SECURITY AGENCY TECHNICAL COMMITTEE

SUBJECT: Type Classification of ASAN 13

1. REFERENCES:

IRS from AS-94 to AS-20 through AS-90. Subject: Type Classification of Rock Terminal Equipment, dated 1 April 1949.

2. DISCUSSION:

a. Agency concerned:

(1) Using Agency: Army Security Agency

(2) Other probable interested Agencies: Navy

b. The purpose of the equipment is to receive, demultiplex and print foreign 2-6-9 channel time multiplexed, automatic, radio printer traffic.

c. One complete equipment comprises a standard cabinet rack of electro-mechanical gear and 9 modified Model 14 Teletype typing-reperforators. One major component of this equipment, the electro-mechanical, demultiplexing distributor, can be replaced with other distributors for processing different types of time multiplexed, radio printer traffic. It is contemplated that such additional distributors will be developed in the future.

d. Related materiel:

(1) A radio intercept receiving system is required in conjunction with this item.

(2) There is no available existing equipment for the same or similar purposes, so there is no improvement of the item over existing materiel.

~~SECRET~~

(3) There are no existing items which must be modified and new items which must be classified before issue of this item can be accomplished.

(4) There is no stock status of an item being replaced or superseded since there is no other existing equipment.

e. A development project was initiated on 4 September 1946 by Army Security Agency. An engineering model was developed and used as a basis for preparing specifications for the procurement of twenty-five (25) service test models by contract and for producing twenty (20) models by Army Security Agency. The contract was executed with Industro-Matic Corporation of America on 30 June 1947 and was completed on 23 May 1949. The models developed by Army Security Agency were completed on 25 July 1948. All forty-five (45) equipments have been issued to the field for service testing. Test results indicate that this equipment is satisfactory for classification.

f. Item is new type.

### 3. PERTINENT DATA:

a. This equipment is non-expendable.

b. The estimated unit cost in small quantity procurement is \$5,000.00.

c. No formal military characteristics were prepared, but performance specifications were written. The equipment meets the requirements of these specifications.

d. The number of units procured, on hand, and on outstanding contracts is forty-five (45).

e. Future procurement of the item is contemplated.

f. Facilities exist for reproduction of this item, and no unforeseen complications are expected with the procurement of other classified items.

g. No large quantity production is contemplated.

h. No strategic or critical materials are required in significant quantities.

i. Training courses have been established at Army Security Agency school for the instruction of using troops. One enlisted man specialist having MOS 1799 (Non-Morse Operator) is required for the operation of each item and one enlisted man specialist having MOS 868 (Non-Morse Maintenance) is required for the maintenance for five (5) units of this item.

~~SECRET~~

j. Training and maintenance literature is available in sufficient quantities.

k. Security classification of this item is CONFIDENTIAL.

l. This item is air transportable, and when so transported it will be packaged for shipment in compliance with current directives. It may be used in phase four (4) of air operations.

4. RECOMMENDATIONS:

a. The official name for this item to be ASAN 13.

b. Classification as STANDARD TYPE. The equipment is now classified DEVELOPMENT TYPE.

c. No item is being replaced or supplemented.

d. The project will be continued to develop supplementary electromechanical commutators.

e. The Army Security Agency be charged with the preparation of specifications, determination of requirements, provision of funds, purchase, inspection, storage, issue, and maintenance of this item.

f. This item is non-expendable and will have a life expectancy of from three (3) to five (5) years.

g. The ASAN 13 be supply class IV.

h. The initial quantity of the ASAN 13 be forty-five (45). (The number now on hand).

5. EXHIBITS:

None.

6. COORDINATION:

There was no coordination as to type classification with any other Agency.
