

Bill:

This apparently all refers to German interception of 5th Army stuff, and I should think it certainly should be communicated to the C G and/or SIS of 5th Army, if not already done so. [But we must not reveal source.]

Also this would be a good opportunity to ask for a lot of this traffic which is monitored by the Staff Info. and Liaison Detachment (SIAM) of 5th Army, not only for study by our own Transmission Security Section in C Branch but to furnish plausible traffic for the setting up of problems in that section. Copies of this

paper should be <sup>REF ID: A4148591</sup>  
Foreign Cryptanalytic file, in  
Major Hirsch file, and to  
the files of security section  
C Branch.
