REF ID:A4148934

Ciphered Messages Prepared for Col. Fabyan, of Chicago.

June 7, 1918.

Attached hereto are some telegraph messages which have been prepared for Col. Fabyan, of Chicago. These messages have been ciphered by printer methods, which Mr. Gherardi has described to Col. Fabyan, and have been put into two forms:

a. Perforated tape form

b. Typewritten form.

It is thought the following information will be helpful to Col. Fabyan in considering these messages.

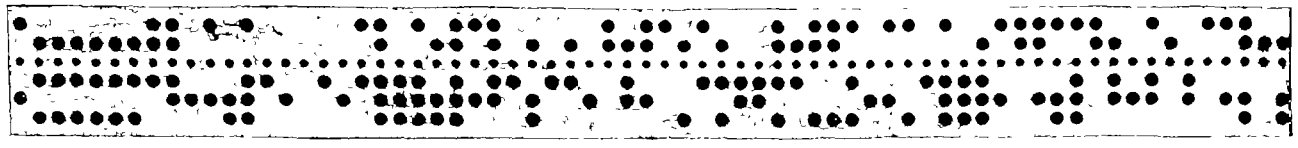
1. Our standard printer alphabet was used in preparing these messages. This alphabet consists of thirty-two characters. What these characters are is shown on the attached sheet marked "Multiplex Perforator Tape."

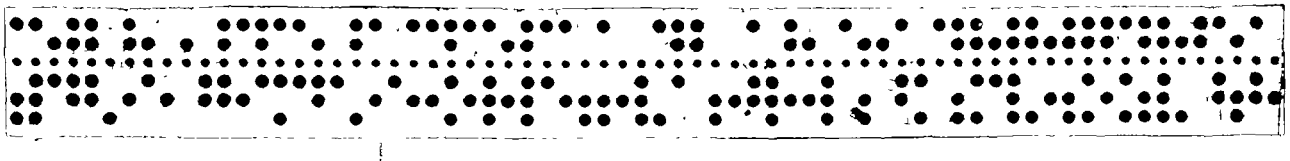
2. The messages enciphered are in military language, and are such as would be met with daily in handling affairs of the Army. For convenience they have been numbered from 1 to 7.

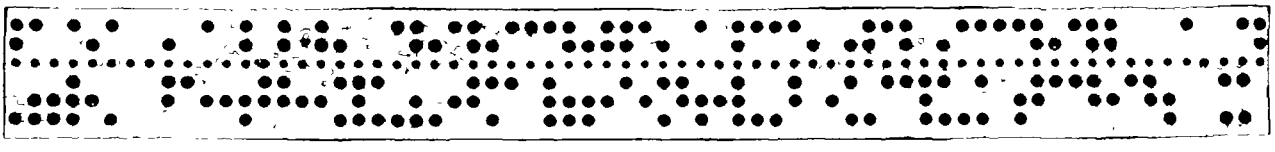
3. In preparing these messages the message to be enciphered was first put in perforated tape form, and then enciphered by combining this tape with one or more others having the characters of the printer alphabet, chosen at random. The perforated tapes prepared for Col. Fabyan were the result of this combination. The typewritten messages have been prepared from the messages in tape form by writing the enciphered message out on the typewriter, employing certain numerals to designate certain printer operations, as will be explained later. The result of combining by printer methods various characters of the printer alphabet is shown on sheet marked "Cipher Square."

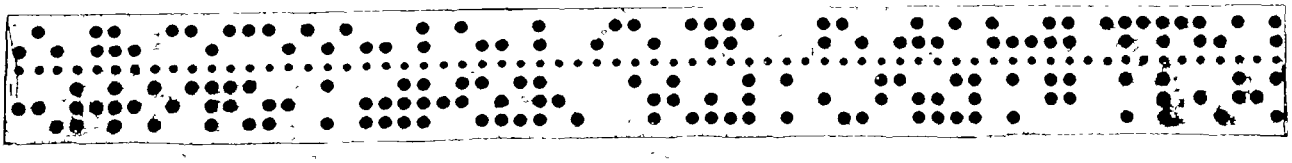
Approved for Release by NSA on 11-19-2014 pursuant to E.O. 13526

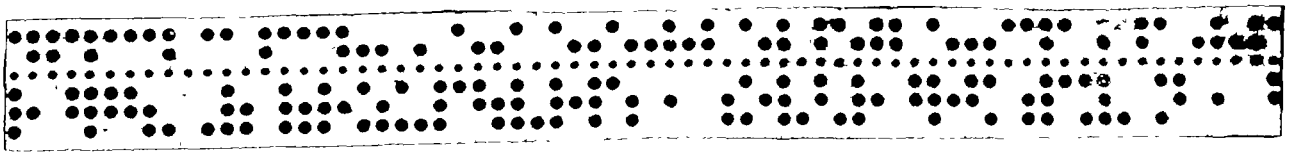
MESSAGE NO. 1 June 3, 1943.

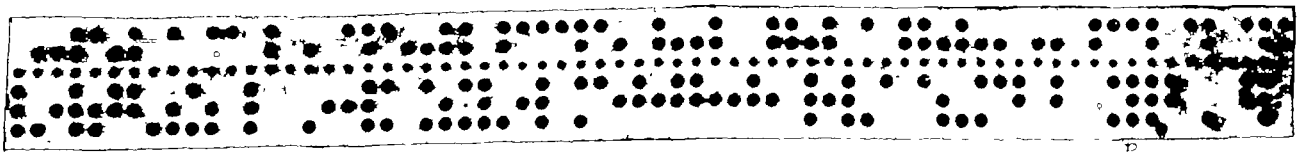












REF ID:A4148984

4. The messages, whether in tape or typewritten form, should be read from left to right and from the top down, as in reading an ordinary page of typewritten matter.

5. Messages Nos. 1, 2, 3, and 4 were enciphered with a single ciphering tape, consisting of 2,000 selections made at random from the printer alphabet of thirty-two characters.

6. Message No. 1 makes use of the first part of this enciphering tape, and does not overlap any of the other messages.

7. Messages Nos. 2 and 3 start at the same point in the enciphering tape, but beyond that section of the enciphering tape used for message No. 1.

8. Message No. 4 utilizes a portion of the enciphering tape employed with messages Nos. 2 and 3, but extends to a character in the enciphering tape beyond the end of either of these two messages.

9. Messages Nos. 5, 6, and 7 make use of two ciphering tapes, one having 1,000 characters and the other 999 characters of both of which being chosen at random from the thirty-two characters of the printer alphabet. In enciphering messages Nos. 5, 6, and 7 the enciphering tapes were started at different points.

10. As noted under 3 above, the typewritten messages were obtained by transcribing the enciphered message in tape form by means of the typewriter. The figures 2, 3, 4, 5, 6, and 7, appearing in the typewritten form, are the characters which have been used to take the place of the printer functions. What these functions are and what each figure represents are shown in red on the alphabet referred to above.

Attached:

Telegraph messages numbered
1 to 7, in perforated tape
and in typewritten form.
Sheet marked "Multiplex Perforator
Tape"
Sheet marked "Cipher Square"

Printing Telegraph Ciphers.

Colonel G. Fabyan
Riverbank
Geneva
Ill.

June 11, 1918.

Colonel George Fabyan,
Riverbank,
Geneva, Ill.

My dear Colonel Fabyan:

Not having received a reply to the question in my letter of May 25 as to whether you would prefer to have the typewritten ciphered messages or the ciphered tape, I am sending you both enclosed herewith. I am also sending you certain information in regard to the ciphers which is of such a character that I believe if the cipher were to be employed to any extent it would promptly become known to those undertaking to break the cipher. I am not a cipher expert and would not presume to say what can and cannot be done, but should you and Professor Friedman decipher messages Nos. 1, 5, 6 and 7, I shall feel that I owe you both a good dinner. I have no doubt that you can decipher Nos. 2, 3 and perhaps 4. These, however, as you understand are not the arrangement which we propose.

Thank you for the books which arrived a few days ago. I think perhaps if I have time to apply to them that which it
