

16 FEB 1961

Mr. L. W. Reese
801 South Ivy Street
Arlington 4, Virginia

Dear Mr. Reese:

Thank you for your letter of 2 February 1961, calling to my attention the subject of the M-11 Filters. I have been advised that the statements contained in your letter concerning the filters are substantially correct. I have, therefore, directed that the PROD Awards Committee re-evaluate your beneficial suggestion. From the information I now have, it appears that the adaptation of the M-11 Filter is feasible, practicable, and would represent a saving in funds.

Good suggestions are always appreciated and you will be hearing from the PROD Awards Committee in due course.

Sincerely,

L. H. Frost
